JOGNN seeks research, review, clinical, and policy manuscripts to build and apply the evidence supporting quality, safe, cost-effective, and patient-centered health care for women, childbearing families, and newborns. A balance of quantitative and qualitative research with an emphasis on biobehavioral outcome studies and intervention trials is desired. Manuscripts are welcomed on all subjects focused on the care of women, childbearing families, and newborns. The topics below are of particular interest. Manuscripts related to topics already published are welcomed. Case studies that illustrate evolving or new approaches to care, particular challenges in care delivery, or unanticipated outcomes are also appropriate for submission.

Top 5 Reasons to Submit Your Manuscript to JOGNN

- Vast circulation reaching more than 25,000 nurses and other health care professionals across the globe
- Solid Impact Factor and ISI rankings among nursing and obstetrics and gynecology journals
- Easy electronic submission via http://jognn.edmgr.com and fast review times
- Rapid publication in print and online at http://jognn.org
- 45 years as a premier scholarly clinical journal
